

auum

A single move to end single use !

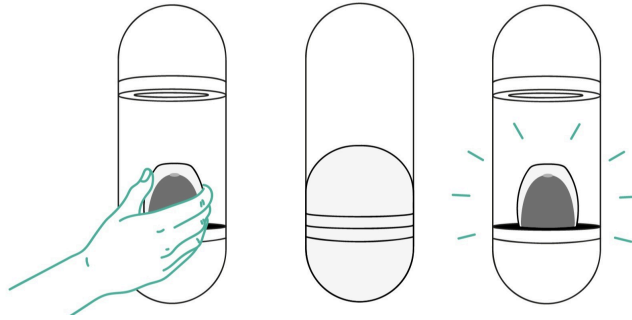

The Auum-S has arrived!

You can now start to clean and reuse your glass endlessly by using the auum-S machine.

[Discover auum-S](#)

A single move to clean and reuse.

1. Take one Bodum glass on the tray located next to the AUUM-S device.
2. Drink your favorite hot beverage without burning yourself thanks to the double-walled glass 😊
3. When you're done, position your glass inside the device and allow the dome to close automatically.
4. Your glass is cleaned, disinfected, and dried - ready to be reused! Magic, isn't it?

The most sustainable alternative to disposable cups

Every creation has an impact on our planet. So does our aum-S. To reduce its carbon footprint, we strive to select the most sustainable materials and keep our supply chain local.

6000 cycles and **40 days** are enough to make our aum-S profitable. Of course it depends on how much you use it. The more you use it the more it is profitable for the environment. We are counting on you to give aum-S the sustainable purpose it deserves!

Follow us on social medias

Share your experience on social medias and take part of our committed community by posting a picture of you, your glass or the aum-S in your company.
